CEUs: 2 SW, NBCC, QIDP, QMHP,

QBHP *(Pending)*

These presentations are supported by:

Overview: The GMOA program helps people with disabilities, along with their families and supports, make housing plans to get a home of their own. As an individual with a disability you may have additional and different concerns when you move out of your family home or to a new living arrangement. These presentations introduce how to make housing plans based on your needs, choices and resources. Families, guardians, friends, and professionals are also welcome to attend with you or on their own.

Discussion Topics Include:

- Resources and tools to assist in the Person Centered Planning process
- How to assist in making housing goals using the person centered planning process and self-determination principles
- Creating housing budget, including public and private funding sources
- Decide the appropriate level of direct care and other supports
- Options for affordable housing through renting or buying
- Identifying roommates to share housing cost and companionship
